

Being compact and light, you can also use the sweeper when space is limited or in congested areas. The brooms are rotated by the gear system as the machine is pushed forward by the user, making the sound level low. There is no motor, so daytime cleaning is an attractive, cost-saving option. The user will enjoy several benefits such as the soft grip handle which is adjustable to always ensure a comfortable working position. Dust being limited by the built-in filter and the easy handling of the large hopper when it needs to be emptied. All-in-all this fast and productive Nilfisk sweeper is an ideal choice for applications such as cleaning in small factories, car parks, malls, schools, workshops, bus/railway stations as well as outside office buildings.
