

Mid range cold water high pressure washer external FoamSprayer detergent system

The MC 4M is equipped with two new and very user-friendly features to make the products more easy to use and understand. Special holder for spray gun. Our studies also showed that one of the elements most broken during transport of the pressure washer is the spray gun. Simply because it is not always stored correctly and thus is left unprotected. The MC line includes an innovative spray gun holder that will keep this equipment out of harm's way. Turnable electrical cable hook. A simple feature, but already greatly appreciated by customers of other products in our range. The turnable hook makes it simpler to wind and unwind the electrical cable, reducing the hassle linked to preparation or storage of the machine. This range of machines brings a clear reduction in the total cost of ownership for our customers, which has been a key element in our strategy. The MC range of pressure washers increase cleaning efficiency on average by 15%. Thanks to the external detergent injector system, the real working pressure at the nozzle is increased and the cleaning time can be reduced by up to 15% - and this saves labor, water and electricity costs! Also part of our efforts to reduce total cost of ownership, the serviceability of the MC line has been improved by an optimal level of accessibility to motor and pump. On board pump oil tank and fill/empty system make basic maintenance tasks such as oil checking simple for the user. And in case of

Picture shown may not represent model quoted

maintenance by a service organization, the easy to access concept will reduce maintenance time and cost.

Powered by a 1450 rpm high-quality motor pump Brass pump head and three ceramic coated pistons Pressure activated unloader system Pump oil tank with oil level sight and fill/empty function Easy opening and removing of cabinet for access to the pump Innovative holder protects Spray Gun from damage during storage and transport Turnable cable hook for easier removal and wind-up of power cable Robust design with larger 250 mm wheels optimizes transport over rough surfaces and steps Aluminum lifting bar

MC 4M is designed for light, general cleaning tasks and is the ideal choice for tradesmen, small building companies, small garages and farms. This range is equipped with a professional 1450 rpm motor pump unit with ceramic coated for slightly heavier applications, developed for low to medium intensity use.
